

TNMG-YM-TP9502A

Product Images

Summary

Features and benefits

- Double rake design to ensure cutting sharpness and strength requirements
- Convex chip breaking structure to achieve chips under different depth of cut and feed processing capacity;
- Large side grooves, large chip space, prevent chip accumulation

YM

•Double rake angle design
 ensures cutting efficiency
 and strength requirements;
 •Hollow chip breaking
 structure to reduce cutting
 depth of cut and lead of chips
 processing capacity;
 •Large rake angle, large chip
 space, prevent chip accumulation
